## MAM Pigmentierte Läsionen LuxG

Hauttyp	Zone	Energie (J/cm <sup>2</sup> )	Pulslänge (ms)
Verwendung von kurzen Pulsen			
I–II	Gesicht, Arme, Körper oder	32–44	20
		28–36	10
III	Brust, Nacken, Arme, Hände	28–38	20–40
IV		26–38	20–40
I–II		30–40	20
		bei helleren, resistenten Pigmentierungen	26–33
III		22–32	20
IV		22–28	20

Hauttyp	Zone	Energie (J/cm <sup>2</sup> )	Pulslänge (ms)
Verwendung von langen Pulsen			
I–II	Gesicht, Arme, Körper	40–60	100
III		32–48	100
IV		32–42	100
I–II	Brust, Nacken, Arme, Hände	36–42	100
III		34–42	100
IV		32–42	100
IV			30–45

- When possible, isolate lesion with mask especially if there is concern about the skin color (or tan) surrounding the lesion – this is not always practical if there is bronzing mixed with the distinct lentigenes

- Skin on the extremities is less “resilient” than skin on the face – pigment takes longer to clear and over-treatment will take longer to heal
